

## DIVISION F - WOODWORKING

Units 1, 2 and 3 in Woodworking have very specific restrictions on the tools used in building an article to display. This is done for reasons of safety and to provide a fair comparison among projects in a unit. An exhibit that shows evidence of not following these restrictions will be limited to a white ribbon.

In making all placing's, judges will consider straightness, accuracy and smoothness of saw cuts, the difficulty and preciseness of joints, the skill employed in the use of nails, screws, gluing And other hardware, freedom from tool or sandpaper marks, appropriate finish evenly applied, article attractiveness, proportions and use of proper wood for the intended use, ability to follow instructions, quality of workmanship and completeness of e-record. Always use proper safety gear.

For large exhibits – like beds – please bring only the head and foot boards. No rails.

Project will be evaluated on the quality of information completed in the manual and e-record (25 percent) and quality of exhibit (75 percent).
